User stories for categories

Categories 🔗

1. **Feature**: Create Category
   - **User Story**: **As an admin,** I want to **create a new category** so that I can organize content more effectively.

   Acceptance Criteria:

   Given I am **logged in** as an admin, when I navigate to the **category management page**, then I should see an option to **create a new category.** I should see a form to enter the category name and description.

   When I **fill out** the form with valid inputs and click the **"Create"** button, then the **new category** should be added to the list of categories.

   Given I attempt to create a category with a duplicate name, **when** I click "Create", **then** I should see an error message indicating the name is already in use.

2. **Feature**: Create Subcategory

   - **User Story**: **As an admin**, I want to create subcategories within a main category **so that** I can further organize and structure my items or tasks.

   Acceptance Criteria:

   Given I am on the category management page, **when** I select a main category and click "Add Subcategory," **then** I should see a form to enter the subcategory name and description.

   Given I fill out the form with valid inputs, **when** I click "Save," **then** the new subcategory should be created and visible under the main category in the category list.

   Given I attempt to create a subcategory with a duplicate name within the same main category, **when** I click "Save," **then** I should see an error message indicating the name is already in use.

   Given there are subcategories created under a main category, **when** I view the category list, **then** I should see the subcategories nested under their respective main categories.

3. **Feature**: Create Minor Category
   - **User Story**: **As an admin**, I want to create minor categories within subcategories **so that** I can add further levels of organization.

   Acceptance Criteria:

   Given I am on the category management page, **when** I select a subcategory and click "Add Minor Category," **then** I should see a form to enter the minor category name and description.

   Given I fill out the form with valid inputs, **when** I click "Save," **then** the new minor category should be created and visible under the selected subcategory.

   Given I attempt to create a minor category with a duplicate name within the same subcategory, **when** I click "Save," **then** I should see an error message indicating the name is already in use.

   Given there are minor categories created under a subcategory, **when** I view the category list, **then** I should see the minor categories nested under their respective subcategories.

4. **Feature**: Edit Category
   - **User Story**: **As an admin,** I want to edit an existing category so that I can update its details to keep the information current.

   Acceptance Criteria:

Given I am on the category management page, **when** I click on an existing category, then I should see an option to **edit** the category.

When I **change** the category name or description and click **"Save"**, then the updated information should be reflected in the category list.

Given I leave the name field blank or input invalid data, **when** I click "Save," **then** I should see an error message specifying the required corrections.

5. **Feature**: Delete Category
   - **User Story: As an admin,** I want to **delete** a category so that I can remove unnecessary categories.

     Acceptance Criteria:

     Given I am on the category management page, **when** I select a category and click the **"Delete"** button, then I should see a **confirmation** prompt.

     When I confirm the deletion, then the category should be removed from the list.

6. **Feature**: View All Categories
   - **User Story: As an admin,** I want to **view all existing categories so that** I can easily understand and manage my organizational structure.

     Acceptance Criteria:

     Given I am on the category management page, **when** the page loads, **then** I should see a list of all categories with their names and descriptions.

     Given there are no categories created, **when** I access the category management page, **then** I should see a message indicating no categories are available.

     Given there are many categories, **when** I view the list, **then** the categories should be scrollable for better usability.

---

7. **Feature**: Assign Jobs/Skills to Category
   - **User Story: As an admin**, I want to **assign jobs, skills, service types, or specific services to a category** so that users can easily find relevant opportunities and resources.

     Acceptance Criteria

     Given I am on the category management page, **when** I click on a specific minor category, **then** I should see an option to assign jobs, skills, service types, or specific services to that category.

     Given I am on the assignment page, **when** I select the desired jobs or skills from an existing list or choose to add them manually, **then** these jobs or skills should be linked to the category and appear in the category's details.

8.**Feature**: Manual Addition of Jobs/Skills

User Story: As an admin, I want the ability to manually add jobs or skills to a category, so I can ensure all relevant opportunities are included, even if they are not in the existing list

   Acceptance Criteria

   Given I am on the assignment page, **when** I do not find the desired jobs, skills, service types, or specific services in the existing list, **then** I should see an option to "Add Manually."

   When I click "Add Manually," **then** I should see a form where I can enter the job or skill name and description.

   When I fill out the form and click "Save," **then** the new job or skill should be added to the existing list and automatically assigned to the category.

When I navigate back to the category details, **then** I should see the **newly added** jobs or skills **in the list of assigned items** (the specific section within the category details where all the jobs or skills that have been linked to that category are displayed)

---

9. **Feature**: Browse Content by Categories

   User Story: As a user, I want to browse content by categories so that I can find relevant information more easily.

   Acceptance Criteria:

   Given I am on the **main site**, when I **select** a category from the **category list**, then I should see **a filtered view** displaying only the content associated with that category.

   When I **click** on an item **within the filtered view,** then I should be taken to the **detailed page** of that item.

   Then the detailed page should also display:

   Filter options to refine the search further

   Profiles of freelancers related to the category or item

features 7 & 8 edited version , These features are less important; they are also extra. We may think about them later. 🔗

Create and Manage Lists within Minor Categories 🔗

As an: admin **, I want**: to create and manage lists of items such as skills and jobs inside minor categories **So that**: I can organize and reuse lists and ensure updates are reflected globally

Acceptance Criteria:

1. **Creating Lists**:

As an: admin, **I want:** to create a new list within a minor category

So that: I can organize items within that category

Acceptance Criteria

   Given I am on the category management page

   When I select a specific minor category

   Then I should see an option to create a new list and name it

2. **Adding Items to Lists within Minor Categories**

Title: Assign Skills or Jobs to Minor Categories

As an: admin

I want: to add specific items, such as skills or jobs, to lists within minor categories

So that: I can effectively assign relevant skills or jobs to the minor categories

   Acceptance Criteria

   Given I am on the list creation page

When I choose to add items manually

Then I should be able to add specific items, such as "React JS" or "HTML" to the list

3. **Using Lists in Other Categories**

As an: admin

I want: to select from existing global lists when assigning skills to a different minor category

So that: I can reuse lists and maintain consistency

Acceptance Criteria

Given I am on the category management page

When I am assigning skills to a different minor category

Then I should have an option to select from existing lists

4. **Editing Lists**:

As an: admin

I want: to edit lists by adding more items or modifying existing items

So that: I can ensure the lists are up-to-date and accurate

Acceptance Criteria

Given I am on the category management page

When I select a list

Then I should be able to edit the list by adding more items or modifying existing items

5. **Global Update Reflection**:

As an: admin

I want: changes made to a list to be reflected globally

So that: updates are consistently applied across all categories that use the list

Acceptance Criteria

Given I have edited a list

When I make changes to the list

Then these changes should be reflected globally in all categories that use this list

6. **Deleting Lists:**

As an: admin

I want: to delete a specific list

So that: I can remove outdated or unnecessary lists, ensuring the lists remain relevant and clean

Acceptance Criteria

Given I am on the category management page

When I navigate to any minor category

And I select a specific list

Then I should be able to delete the list

7. **Viewing lists' items:**

As an: admin

I want: to see all the items that have been selected from the global lists for a specific minor category

So that: I can verify and manage the items assigned to that minor category

Acceptance Criteria

Given I am on the category management page

When I navigate to a minor category

Then I should see all the items that have been selected from the global lists for that category
